

CompTIA.

Solutions Catalog

Leading the industry for over 40 years, building training and certification solutions that fill critical skills gaps.

THE
CompTIA[®]
EXPERIENCE

Hello.

CompTIA is a global leader in training, certification, and workforce development, empowering individuals to unlock their potential in technology careers.

As the largest vendor-neutral credentialing organization, CompTIA has awarded over 3.6 million certifications worldwide, offering industry-recognized credentials and learning solutions that align with emerging technologies and workforce needs.

Through partnerships with academic institutions, non-profits, and businesses, CompTIA bridges the skills gap, supports career advancement, and drives innovation across the global technology ecosystem.

CompTIA's purpose is to advance the global IT industry by:

- ✓ Educating and Certifying a skilled tech workforce through education and certifications.
- ✓ Empowering individual learners and teams with resources for career changers, professionals and upskilling.
- ✓ Fostering Innovation by creating an environment for technological innovation.
- ✓ Providing Thought Leadership by sharing expert insights on emerging technology trends.

Let us show you what CompTIA can do for you.

OUR PURPOSE

Unlock Potential in Tech

WE ARE

CompTIA[®]

CompTIA's Commitment to Certification

Why Certifications Matter

Industry-recognized certifications are essential in today's tech world. They validate skills and knowledge, meeting IT industry standards. Certifications help learners:

- ✓ **Stand out to employers:** Demonstrate expertise to employers: Certifications validate a proven level of technical expertise, positioning employees as highly qualified for their roles.
- ✓ **Gain confidence:** Boost confidence and performance: Certified professionals gain confidence in their abilities, enabling them to tackle complex challenges and contribute to success.
- ✓ **Stay current:** Ensure up-to-date skills through ongoing education and renewal.
- ✓ **Skill validation:** Certifications provide tangible proof of skills and knowledge, giving confidence in individual's and team's capabilities.
- ✓ **Career advancement:** Certified professionals often have a competitive edge, leading to improved job performance, career advancement, and higher earning potential within an organization.
- ✓ **Practical experience:** Many certification programs include hands-on training and simulations, allowing learners to gain practical experience and apply their knowledge in real-world scenarios.
- ✓ **Career path guidance:** Support career development: Certifications guide learners in identifying and pursuing specialized paths within tech, aligning professional growth with organizational goals.

CompTIA CERTMASTER

The Ultimate Learning Platform for Real-World Experience

CompTIA CertMaster offers an immersive learning experience that prepares individuals for IT certifications and careers. It combines hands-on practice, expert instruction, interactive lessons, and progress tracking, supported by robust tools for efficient class management and tailored learning.

Key Features of CompTIA CertMaster

Perform

Scenario-based performance training

Labs

Hands-on practice in virtual environments

Learn

Interactive, self-paced eLearning

Practice

Reinforces knowledge with exam prep tools

CompTIA OnDemand

Provides a facilitated learning experience, combining a structured curriculum and detailed pacing guides with instructional videos and advanced support features.

Key Features

Instructional videos, virtual labs, and simulations

Curated and structured curriculum

Standard 12-week and custom pacing guides

Skill badges represent achievement and validation of skills and competencies

Achievable, step-by-step assessments build confidence for the exam

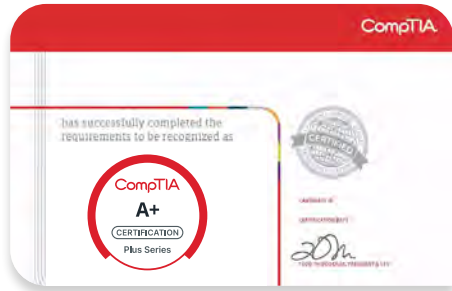

Certification exam voucher + retake

Tech+

TC0-U71

CompTIA Tech+ is the essential certification for launching tech-related careers, providing foundational knowledge and hands-on skills. It covers basic concepts, security, software development, and emerging technologies like AI and Robotics. Prepare individuals and teams for the fast-growing tech industry with practical experience and essential technology skills.

PREPARES FOR:

- ✓ CompTIA Tech+ FC0-U71

This course is also a great starting point in preparing for the following additional certifications:

- A+
- Network+
- Security+
- Linux+
- Cloud+

COURSE TOPICS

- Concepts and Terminology
- Infrastructure
- Applications and Software
- Software Development Concepts
- Data and Data Fundamentals
- Security

COURSE SPECS

- Labs: 47
- Lab Simulations: 47
- Videos: 58
- Assessments: 57
- Questions: 800+
- Estimated Instructional Hours: 33 hours

A+

220-1201 and 1202

CompTIA A+ is the industry standard for launching IT careers, covering essential skills in security, networking, virtualization, and cloud computing. Trusted by employers, it prepares individuals to diagnose and resolve software, hardware, and connectivity issues, supporting a hybrid workforce. Set learners on a path to success in technical support and endpoint management roles.

PREPARES FOR:

- ✓ CompTIA A+ 220-1201 (Core 1) and 220-1202 (Core 2)

This course is also a great starting point in preparing for the following additional certifications:

- Network+
- Security+
- Server+
- Linux+
- Cloud+

COURSE TOPICS

- Hardware
- Operating Systems
- Networking
- Troubleshooting
- Security
- Mobile Devices
- Virtualization
- Cloud Computing

COURSE SPECS

- Labs: 55
- Live Labs: 55
- Videos: 52
- Assessments: 23
- Questions: 400+
- Estimated Instructional Hours: 85 hours

Network+

N10-009

CompTIA Network+ is the premier certification for validating essential networking skills. It equips individuals to establish, maintain, troubleshoot, and secure networks in any environment, preparing them for careers in networking and cybersecurity. Covering a wide range of technical and hands-on skills, Network+ is vendor-neutral and is ideal for roles like Technical Support Specialist and Network Operations Center Technician.

PREPARES FOR:

- ✓ CompTIA N10-009

This course is also a great starting point in preparing for the following additional certifications:

- Server+
- Security+
- Linux+
- Cloud+
- CloudNetX

COURSE TOPICS

- Network Topologies
- Cabling and Physical Installations
- Interfaces and Switches
- Network Addressing
- Routing and Advanced Switching
- Network Services
- Application Services
- Network Management
- Network Security Design Concepts, and Features
- Wireless Networks
- Remote Access

COURSE SPECS

- Labs: 163
- Live Labs: 21
- Simulated Labs: 142
- Videos: 137
- Assessments: 99
- Questions: 3,500+
- CertMaster Perform Estimated Instructional Hours: 103 hours

Security+

SY0-701

CompTIA Security+ is the global certification that validates essential IT security skills, preparing individuals for successful cybersecurity careers. As the leading early career certification, it equips learners with hands-on, performance-based skills to tackle real-world security challenges and stay current with trends like automation and IoT. Security+ provides a strong cybersecurity foundation, making learners trusted defenders of digital environments.

PREPARES FOR:

- ✓ CompTIA SY0-701

This course is also a great starting point in preparing for the following additional certifications:

- PenTest+
- CySA+
- Security X

COURSE TOPICS

- General Security Concepts
- Threats, Vulnerabilities and Mitigations
- Security Architecture
- Security Operations
- Security Program Management and Oversight

COURSE SPECS

- Labs: 41
- Live Labs: 41
- Videos: 58
- Assessments: 17
- Questions: 300+
- Estimated Instructional Hours: 71 hours

Cloud+

CV0-004

CompTIA Cloud+ is the premier certification for validating essential cloud computing skills. It prepares individuals to implement, maintain, optimize, and troubleshoot cloud-based infrastructure, covering cloud architecture, deployment, operations, security, DevOps, and troubleshooting. Equip learners with hands-on, vendor-neutral expertise needed for in-demand cloud roles.

PREPARES FOR:

- ✓ CompTIA CV0-003 and CV0-004

This course is also a great starting point in preparing for the following additional certifications:

- Server+
- Security+
- Linux+
- Cloud+
- CloudNetX

COURSE TOPICS

- Cloud Services
- Cloud Resource Management and Automation
- Cloud Storage
- Deployment Issues and Costs
- Virtualization and Databases
- Cloud Networking
- Security Management
- Security Compliance and Troubleshooting
- Performance and Monitoring
- Disaster Recovery and Business Continuity

COURSE SPECS

- Labs: 27
- Live Labs: 24
- Simulated Labs: 3
- Videos: 32
- Assessments: 69
- Questions: 1,500+
- Estimated Hours: 57

Linux+

XK0-005

Linux+ is the essential certification for mastering Linux systems, providing comprehensive knowledge and practical skills. Ideal for individuals, it covers core Linux concepts, system administration, networking, and security. Equip individuals and teams with the expertise needed for the ever-evolving tech landscape, ensuring they gain hands-on experience and critical Linux skills.

PREPARES FOR:

CompTIA XK0-005

This course is also a great starting point in preparing for the following additional certifications:

- Security+
- Cloud+
- CCNA
- AZ-800

COURSE TOPICS

- Installation & Localization
- Boot & Shutdown
- Graphical User Interfaces & Desktops
- Software Installation
- User & Groups
- Disk & File System
- Management
- Hardware Installation
- Processes & System
- Services
- System Monitoring
- Networking & Security
- Cloud & Virtualization
- Scripting & Automation
- Security

COURSE SPECS

- Lab Simulations: 98
- Videos: 231
- Assessments: 98
- Questions: 800+
- Estimated Instructional
- Hours: 75 hours

CySA+

CS0-003

CySA+ is the ultimate certification for elevating careers in cybersecurity defense, offering comprehensive expertise and strategic skills. CompTIA CySA+ encompasses advanced threat analysis, proactive defense strategies, and robust incident management. Equip students and educators with the essential tools and hands-on experience needed to excel in the ever-evolving cybersecurity landscape.

COURSE TOPICS

- Threat Intelligence & Risk Mitigation
- Social & Physical Security
- Reconnaissance &
- Enumeration
- Vulnerability Management
- Identity & Access
- Management Security
- Cybersecurity Threats
- Infrastructure Security &
- Analysis
- Wireless & IoT Security
- Software Assurance
- Data Analysis
- Incident Response

COURSE SPECS

- Lab Simulations: 71
- Videos: 182
- Assessments: 62
- Questions: 1,200+
- Estimated Instructional

PenTest+

PT0-002

CompTIA PenTest+ is the comprehensive certification for penetration testing and vulnerability management. It covers all stages of penetration testing with performance-based and knowledge-based questions, ensuring learners master the latest techniques for various environments. Equip individuals and teams with hands-on skills in vulnerability assessment, scanning, analysis, and reporting, preparing them for advanced cybersecurity roles.

PREPARES FOR:

- ✓ CompTIA PT0-002 and PT0-003

This course is also a great starting point in preparing for the following additional certifications:

- CySA+
- CASP+
- SecurityX

COURSE TOPICS

- Plan and scope a penetration testing engagement
- Understand legal and compliance requirements
- Perform vulnerability scanning and penetration testing using appropriate tools and techniques, and then analyze the results
- Produce a written report containing proposed remediation techniques, effectively communicate results to the management team, and provide practical recommendations

COURSE SPECS

- Labs: 16
- Live Labs: 16
- Videos: 11
- Assessments: 21
- Questions: 200+
- Estimated Instructional Hours: 28 hours

Digital Literacy Pro

2.0

Digital Literacy Pro is designed for both individuals and teams in higher education institutions who need to develop essential digital skills to thrive in today's technology-driven world. This certification equips you with the fundamental digital literacy concepts and practical skills necessary to bring value to your academic and professional endeavors.

This comprehensive toolbox offers students active, hands-on experiences in solving real-world challenges through online labs. The user-friendly curriculum includes videos, demos, lab simulations, and quizzes, equipping learners with the skills needed to navigate tomorrow's tech challenges.

COURSE TOPICS

- Keyboarding
- Hardware
- Operating System and File System
- Intro to Applications
- Word Processing
- Spreadsheets
- Presentations
- Other Common Applications
- Online & Cloud Collaboration
- Internet, Social Media and IoT
- Mobile Technology
- Digital Citizenship
- Programming Fundamentals
- Career Pathways

COURSE SPECS

- Labs: 86
- Videos: 182
- Assessments: 100
- Questions: 1,140
- Estimated Hours: 32

Office Pro

8.0

Office Pro offers an all-in-one learning solution for Microsoft Office Specialist applications, including Word, Excel, PowerPoint, Access, and Outlook, along with advanced content for Word and Excel. Individuals will learn, practice, apply, and test their skills in real-world business scenarios, preparing them for certifications and professional careers. Our simulated labs ensure students acquire and retain proficiency in Office applications.

PREPARES FOR:

- ✓ MOS Word Associate 2019 (MO-100)
- ✓ MOS Word Associate 365 Apps (MO-110)
- ✓ MOS Excel Associate 2019 (MO-200)
- ✓ MOS Excel Associate 365 Apps (MO-210)
- ✓ MOS PowerPoint Associate 2019 (MO-300)
- ✓ MOS PowerPoint Associate 365 Apps (MO-310)

COURSE TOPICS

- Online Essentials
- Computer Essentials
- Common Office Features
- Microsoft Word
- Microsoft Excel
- Microsoft PowerPoint
- Microsoft Access
- Microsoft Outlook

COURSE SPECS

- Labs: 222
- Videos: 282
- Assessments: 38
- Questions: 300+
- Estimated Instructional Hours: 69 hours

Project+

PK0-005

CompTIA Project+ covers essential project management skills like planning, execution, and resource management. This certification enhances learners' ability to successfully complete projects and prepares them for future career opportunities.

PREPARES FOR:

- ✓ CompTIA PK0-005

This course is also a great starting point in preparing for the following certification:

- Project Manager Professional (PMP)

COURSE TOPICS

- Project Management Concepts
- Project Life Cycle Phases
- Tools and Documentation
- Basics of IT and Governance

COURSE SPECS

- Labs: 14
- Live Labs: 14
- Videos: 23
- Assessments: 15
- Questions: 200+
- Estimated Instructional Hours: 27 hours

Cloud Essentials+

CLO-002

CompTIA Cloud Essentials+ is designed for both IT and non-technical professionals who need to develop essential business acumen to make informed cloud service decisions. This certification equips you with the fundamental cloud concepts and data-driven cloud recommendations necessary to bring value to your organization.

PREPARES FOR:

- ✓ CLO-002

This course is also a great starting point in preparing for the following additional certifications:

- Cloud+
- Network+
- Linux+
- Server+
- Security+

COURSE TOPICS

- Understanding Cloud Computing Concepts
- Applying Cloud Business Principles
- Advising a Cloud Design and Migration
- Operating in the Cloud
- Managing Cloud Governance

COURSE SPECS

- Videos: 30
- Assessments: 6
- Questions: 100+
- Estimated Instructional Hours: 13 hours

AI Essentials

1.0

The goal of CompTIA AI Essentials is to demystify the use of AI in every profession. The learning journey is intended to demonstrate the appropriate use of the right digital tools and technologies to accomplish specific goals (technical competence), apply knowledge and skills within the workplace to enhance human work, creativity, and understanding the future implications of AI.

COURSE TOPICS

- What is AI? How to effectively work with AI technologies.
- Understanding Generative AI across multiple mediums and practical usage.
- Concepts of prompt engineering and effective use of prompts.
- Balancing Innovation & Privacy.
- Human-AI Collaboration.
- Evolution, Future Trends, and Innovations.

COURSE SPECS

- Videos: 3
- Assessments: 15
- Questions: 107
- Estimated Instructional Hours: 10 hours

Data+

DA0-001

CompTIA Data+ is the essential certification for early-career data analytics professional. It equips learners with skills to mine, analyze, and interpret data, communicate insights, and drive data-driven decisions. Covering data concepts, mining, analysis, visualization, and governance, CompTIA Data+ prepares individuals to excel in data-driven roles. Boost individuals and teams confidence and competency in data analytics.

PREPARES FOR:

- ✓ CompTIA DA0-001

This course is also a great starting point in preparing for the following additional certification:

- DataX

COURSE TOPICS

- Data Concepts and Environments
- Data Mining
- Data Analysis
- Data Visualization
- Data Governance, Quality, and Controls

COURSE SPECS

- Labs: 24
- Live Labs: 24
- Videos: 21
- Assessments: 20
- Questions: 200+
- Estimated Instructional Hours: 30 hours

a+ Cyber

1.0

CompTIA a+ Cyber is designed to guide individuals with no prior cybersecurity experience to a point where they are prepared to undertake Security+ training.

PREPARES FOR:

Prerequisite knowledge needed to undertake Security+ training.

This course is also a great starting point in preparing for the following additional certifications:

- Security+
- PenTest+
- CySA+
- Security X

COURSE TOPICS

- Cybersecurity Support Roles
- Microsoft Windows Administration
- Secure Network Client Fundamentals
- Enterprise Campus Network Fundamentals
- Enterprise Network Application Fundamentals
- Cybersecurity Controls
- Linux App Server Fundamentals
- Automation Scripting Fundamentals
- Data Management Fundamentals

COURSE SPECS

- Labs: 30
- Live Labs: 30
- Videos: 30
- Assessments: 11
- Questions: 82
- Estimated Instructional Hours: 32 hours

a+ Network

1.0

CompTIA a+ Network is designed to guide individuals with minimal to no experience in IT Networking to a point where they are prepared to undertake Network+ training.

PREPARES FOR:

Prerequisite knowledge needed to undertake Security+ training.

This course is also a great starting point in preparing for the following additional certifications:

- Network+
- Server+
- Linux+
- Cloud+
- CloudNetX (to be released 2025)

COURSE TOPICS

- Network Client Fundamentals
- Local Network Types
- Other Network Types
- Enterprise Network Application Support
- Network Operations Support Fundamentals
- Network Troubleshooting Fundamentals
- Linux App Server Fundamentals
- Automation Scripting Fundamentals
- Data Management Fundamentals

COURSE SPECS

- Labs: 29
- Live Labs: 29
- Videos: 24
- Assessments: 11
- Questions: 110
- Estimated Instructional Hours: 35 hours

CloudNetX

1.0

CompTIA CloudNetX is a premier certification designed to validate advanced skills in designing, engineering, and integrating secure, scalable networking solutions in hybrid environments.

COURSE TOPICS

- Network Architecture
- Network Security Design
- Network Monitoring
- Troubleshooting
- Network Maintenance

DataX

1.0

CompTIA DataX is the premier skills development program for highly experienced professionals seeking to validate competency in the rapidly evolving field of data science.

COURSE TOPICS

- Mathematics and Statistics
- Operations and Processes
- Modeling, Analysis and Outcomes
- Specialized Applications of Data Science
- Machine Learning

SecurityX

1.0

CompTIA SecurityX (formerly CASP+) is an expert-level cybersecurity certification for security architects and senior security engineers charged with leading and improving an enterprise's cybersecurity readiness.

COURSE TOPICS

- Security Architecture
- Governance, Risk & Compliance
- Security Operations
- Security Engineering & Cryptography

CompTIA Pathway to Jobs
