

FRANK J. GRIMMELMANN
President & CEO/Intelligence Liaison Officer
ACTRA

Frank Grimmelmann serves as Co-Chair (together with Arizona's Chief Information Security Officer) for the Arizona Cybersecurity Team ('ACT'), created through the Governor's Executive Order signed in March 2018. He also serves as a Founding Member of the National Leadership Group for the Information Sharing & Analysis Organization Standards Organization ('ISAO SO') at the University of Texas San Antonio (UTSA), created under the President's Executive Order 13691 in February 2015. As ACTRA's leader, Grimmelmann was invited as the first private sector representative in the Arizona Counter Terrorism Information Center (ACTIC) and served as its first private sector Executive Board representative from 2014-2019. He presently acts as ACTRA's designated private sector liaison to ACTRA's Key Agency and other non-member stakeholders.

Grimmelmann served four terms as AZ InfraGard's President from 2009-2012, serves today on numerous academic advisory boards, co-chairs the Greater Phoenix Chamber's Cybersecurity Workforce Collaborative initiative, and is an engaged Member of the Arizona Technology Council's Cybersecurity Advisory Board.

In 2019, Grimmelmann was honored by the FBI, and the Board of Directors of both ACTRA and Arizona InfraGard as the first recipient of Arizona InfraGard's Visionary Award for creating the ACTRA framework over his last two terms as Arizona InfraGard's president, and ACTRA's resulting collaboration between law enforcement/ intelligence agencies/USCYBERCOM, and its public, private and academic organizations over the past seven years. He was simultaneously recognized by the FBI's then deputy director for his contribution over the years. He remains an active Member of InfraGard and an active lifetime member of the FBI Citizens Academy.

Since 2002, he has devoted his full-time attention to protecting our nation's critical infrastructure and national security interests, through eliminating unnecessary silos that hinder communication, allowing us to respond to today's increasing threat from our cyber adversaries, and in turn permitting ACTRA's Member Organizations to protect their critical infrastructure and our national security interests, while protecting their organization's assets.

Grimmelmann holds a dual MBA in International Business and Finance from the University of California at Berkeley and brings decades of experience as a senior executive in finance, healthcare and government, prior to focusing on Cybersecurity in response to 9/11.
