

**Ron Vokoun**  
Project Manager  
Fluor Corporation

Ron Vokoun is a 31-year veteran of the construction industry with a primary focus on digital infrastructure. As Project Director for Fluor Corporation, Vokoun leads preconstruction and construction efforts for data center projects and focuses on scalable, energy efficient, water conscious and sustainable data center solutions with the lowest total cost of ownership.

With more than 28 years of experience providing mission critical services to customers spanning nearly every industry sector, Vokoun understands the technology and issues involved in successfully delivering today's mission critical facilities.

A seasoned data center construction professional and thought leader, Vokoun is obsessed with understanding customer needs and delivering highly efficient and high-quality data center solutions. His current focus is on webscale/hyperscale solutions and how to deliver them faster without compromising functionality.

Vokoun has successfully managed projects and programs as large as \$650 million and has lived and worked in Nebraska, Texas, Oklahoma, California, Colorado, Japan, Washington, Arizona, Minnesota and South Carolina. In addition, Vokoun is an author and blogger writing about the intersection of data centers and sustainability.

Vokoun earned a B.S. in Construction Management from the University of Nebraska, Lincoln. In addition, he was awarded the certification of Designated Design-Build Professional by the Design-Build Institute of America and is a LEED Accredited Professional with a specialty in Building Design and Construction.

**Specialties:**
